Emilsprayer by Emiliana Serbatoi is a product line of outdoor storage tanks for the spraying of **agricultural pesticides** and **sanification or disinfection liquids**.

The range of tanks is extremely versatile and has wide fields of application:

- **Professional cleaning and disinfection**, using detergents, chemicals and germicidal liquids.
- **Gardening and agriculture**, for the treatment of green areas at professional or domestic level, using plant protection products or herbicides.

All sprayers are constructed of light weight chemically and UV resistant polymer. Moreover, the thickness of the walls and the targeted design avoid product deformation over time and use.

Emilsprayers are equipped with 100% continuous duty membrane pumps and Viton® valves. The integrated pressure switch activates the pump only during the delivery phase of the product, reducing its wear and increasing its efficiency. Spray gun nozzle adjusts from cone to stream; lance, with brass nozzle and swivel connector, poly triggers with fiberglass reinforcement.

Available capacities: from 30 to 980 liters.
