## Polyethylene water tanks

Polyethylene tanks suitable to store drinking water for civil purposes, to be used as water reserves for industrial and fire prevention purposes and to collect rain water or wastewater.

## Description

Our drinking water high density polyethylene tanks are designed and manufactured to store foodstuffs, drinking water and to collect rain water or waste water. Made in linear polyethylene which is a non-toxic material, they are manufactured according to the regulation and directives in force. Rotational moulding process and the use of specific high density linear polyethylene ensure excellent impact strength, resistance against chemical agents, temperature changes, adverse weather conditions and UV rays. These tanks are not transparent and this fact prevents the exposure of stored liquid to sunlight minimizing the growth of algae.

## Main features

- Verydurable, light and easy to handle,
- Manufactured using superior, computerised techniques; this ensures our tanks are produced to the highest standards.
- Thanks to their monolithic structure and homogeneous wall thickness, they are free from any critical point assuring a premium quality
- They can be easily washed by means of traditional detergents thanks to their perfectly smooth inner surface.
- All tanks are supplied with top screwed lid
- Many accessories and fitting to suit client's individual requirements.

## Accessories

Manhole extensions ( diameter cm 47 , height cm 40 )
Manhole extensions ( diameter cm 47, height cm 34)
Manhole extensions ( diameter cm 68 , height cm 42 )
Connection in PE 100 PN 16 with flange DN 63 on flat surface
Connection in PE 100 PN 16 with flange DN 90 on flat surface
Connection in PE 100 PN 16 with flange DN 110 on flat surface
Connection in PE 100 PN 16 with flange DN 63 on not flat surface
Connection in PE 100 PN 16 with flange DN 90 on not flat surface
Connection in PE 100 PN 16 with flange DN 110 on not flat surface
